OPERATING MANUAL: OPENING AND CLOSING ROLL-TITE SYSTEMS

TO OPEN ROLL-TITE SYSTEMS:

1. Undo all bungee cords both sides(if there are bungee cords).
2. With external posts, release upper ratchets, and then lower ratchets.
3. Release swinging lock bars on the rear bow.
4. Open rear flap, roll-up and wind the rope around the cleat.
5. Release the upper ratchets of the internal posts first and then the lower ratchets, at the back of the trailer.
6. Release the front ratchets and the slide lock bars of the headboard (if you want open from the front to the back too).
7. Slide open the tarp pushing the system open.
8. To hold the system in place set one of the driver side rear (or front) toggle clamp attached on the bow foot.
9. Put track guard in the track when using tow motors.

TO CLOSE ROLL-TITE SYSTEMS:

1. Release first all toggle clamps (front and rear bow).
2. Slide the system closed.
3. On the headboard, tighten lower ratchets first, and then operate slide locks.
4. On rear posts, tighten all ratchets, double checking each for tension.
5. Attach safety chains to the posts.
6. Close the rear flap.
7. Make sure the tarp is tight.
8. Attach bungee cords.

NOTE: FOR DROP DECK, OPEN FIRS THE GATE BETWEEN DROPS AND AFTER FOLOW THE SAME STEPS TO OPEN AND CLOSE THE SYSTEM AS FOR FLAT BED.
